This innovative tool enables you to quickly and easily teach carbohydrate counting to ANY diabetic client. So easy to understand, it will simplify and shorten your teaching time as your clients “see” and grasp the effects their food intake has on their glucose levels.

Super 15™ overcomes the restrictive boundaries of language and multi-culturalism. In just 15 minutes you can teach CHO counting utilizing building blocks of carbohydrates. With 4 test tubes of 15, 30, 45, and 60 grams of carbohydrate, Super 15 visually illustrates the quantity of carbohydrates in foods.
